

To whom it may concern,

Thank you for making a donation/sponsoring this walker! Please make sure you fill out the form on the next page. Before you do, here is a little more information on the Lighthouse 2 Lighthouse Ladies and our 2021 main beneficiary, Hermanus Child & Family Services.

What is Lighthouse 2 Lighthouse?

Lighthouse 2 Lighthouse Ladies is an NPO in the Overstrand which hosts a 100km, four-day annual walk from Cape Agulhas Lighthouse to Danger Point Lighthouse. The main purpose of this walk is to raise funds for local charities within the Overstrand Municipality. Approximately 120 ladies from across South Africa register to participate and contribute to this fundraising effort.

How does it work?

Every year we invite charities in the Overstrand to apply for funding for projects. The main beneficiary and the runner-up beneficiary are then chosen by the registered walkers for the following year. This year, 13 very deserving local organisations applied and sent in motivational videos as to why they should be chosen. As always, the decision as to who to vote for was not easy an easy one for the walkers.

Each registered walker is now required to raise a minimum of R4 000 in funds for the main beneficiary which can be paid in two instalments (November and January). Due to COVID-19, the walk has been split into two smaller groups which means that there will be a walk from 18 to 21 February 2021 and a second walk from 13 to 16 May. All the funds raised from both walks will be allocated to Hermanus Child & Family Services.

Our fundraising target is R500 000.

A message from the 2021 main beneficiary: Help us provide a home for children in distress

"It is essential that we help children who are being neglected or subjected to various other forms of abuse. Although we try our utmost not to remove children from their homes, there are cases where the removal of a child is unavoidable. In such cases, children are sometimes placed with a foster parent. We currently have about 250 children in such care in our area of operation. Sometimes it is not possible to place children with foster parents and these children then need to be placed in alternative care like a cluster foster care home.

A cluster foster care home allows children to be taken into foster care in a setting that is closer to a family setting than an institution. The home that we intend to establish will be headed by a foster mother and will take care of six children.

The home's goal is to protect and nurture children by providing a safe, healthy, supportive environment, promoting stability in the children's lives. During their stay in the home, we will work hard towards family reunification, or to connect each child to another safe and nurturing family relationship intended to last a lifetime." – Hermanus Child & Family Services
